Bachelor of Science in Interdisciplinary Studies with a Concentration in Environmental Science

Environmental issues are some of the greatest challenges we face as human society. There is increasing demand for environmental scientists to confront these challenges. Environmental science encompasses the Earth's oceans, atmosphere, surface, and interior as well as how these physical components of the Earth system interact with life (ecology) and human society. Environmental science plays a central role in major current national and world issues (climate change, sustainability, energy, water resources, and biodiversity).

In the **Department of Atmospheric and Environmental Sciences (DAES)** students gain strong and multifaceted education in environmental science. They build a strong foundation in the fundamental basic sciences that govern environmental phenomena. Students gain hands-on experience taking environmental measurements and using software and statistics to unlock the secrets of environmental data.

Coursework is taught by 20 full time faculty and staff members, most of who are active and prominent researchers in their fields of study. Faculty and staff members pride themselves in their teaching and several have won national teaching awards.

Research and Teaching Facilities

ETEC building. Work is underway on a new home for DAES. The new \$184 million Emerging Technology and Entrepreneurship (ETEC) building will house DAES starting in 2021. It will have state of the art teaching and research facilities. ETEC will be shared with the Atmospheric Science Research Center, NYS Mesonet, and College of Emergency Preparedness, Homeland Security and Cybersecurity.

Field trip and fieldwork destinations. Class trips and fieldwork opportunities take advantage of many fantastic nearby environmental sites including: The Albany Pine Bush, The New York State Museum, Thacher State Park, Huyck Preserve, and more!

Maproom DAES houses an electronic "map room" for interactive display of meteorological and environmental data

Whiteface Mtn. Observatory: The UAlbany Atmospheric Sciences Research Center (ASRC) operates an observation center atop Whiteface Mountain in the Adirondacks, measuring chemical species, cloud properties, acid precipitation, and aerosol content.

Curriculum

Environmental Science is interdisciplinary, tying together knowledge from many areas to understand the world around us. Majors start by building a solid foundation in basic science. In junior and senior years, curriculum is tailored to specific student interests and goals.

bunding a sona roundation in basic science. In junior and senior years	
Students choose from four areas of specialization: Geography Sustaine	ability Science & Policy Ecosystems Climate Change
Sample four-year plan for an ENV major.	required classes listed in bold (credits in parentheses)
Semester I	Semester 2
MAT 112: Calculus I (4)	ENV 105&106: Intro. Environmental Science & Lab (4)
CHM 120: General Chemistry I (3)	CHM 121: General Chemistry II (3)
CHM 124: General Chemistry Lab I (1)	CHM 125: General Chemistry Lab II (1)
BIO 130: General Biology: Molecular/Cell (3)	BIO 131: General Biology: Ecology/Evolution (3)
Elective/University Gen. Ed. Requirement	Elective/Gen-ed
Semester 3	Semester 4
PHY 140: Physics I (3)	BIO 202: Intro. Biology lab II (1)
ENV 221: Understanding the Earth (3)	ENV 315: Environmental Stats. & Computation (4)
BIO 201: Intro. Biology lab I (1)	Specialization requirement
ATM 210: Atmospheric Structure/Circulation (3)	Elective/Gen-ed
Elective/Gen-ed	Elective/Gen-ed
<u>Semester 5</u>	<u>Semester 6</u>
ENV 302:Ocean Science (3)	ENV 327: Meteorological and Envi. Measurement (3)
BIO 330: Principles of Ecology & Evolution (3) Specialization	Specialization requirement
requirement	Specialization requirement
Elective/Gen-ed	Elective/Gen-ed
Elective/Gen-ed	Elective/Gen-ed
Semester 7	Semester 8
Specialization requirement	ENV 490: Major Topics in Environmental Science (3)

HSPH 321: Global Environmental Issues and Their Effect on Human Health

Internship and Research Opportunities

Internships.

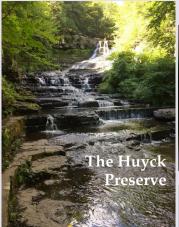

DAES students have many nearby opportunities for **paid and volunteer internships and seasonal jobs**, all of which can provide students with a valuable learning experience and credit towards the major. Some examples are:

- NY State Department of Environmental Conservation is the state agency tasked with protecting and enhancing the environment of New York.
- **NY State Museum** houses a wealth of artifacts on the ecology, geology, anthropology, and culture of the state.
- New York State Mesonet is a network of 126 environmental stations across the state based on the UAlbany campus.
- Albany Pine Bush Preserve Commission protects and manages open space and wildlife at the one of the best remaining examples of an inland pine barrens ecosystem in the world
- Huyck Preserve and Biological Research Station is a non-profit organization with over 2,000 acres of forest, field, and wetland habitat. It is dedicated to research, education, recreation, and conservation.

The endangered Karner Blue Butterfly

(found at Albany Pine Bush)

Research:

Many students work on a research project (for credit) with a faculty member during their junior or senior year. Research ideas may come directly from faculty, but students often come up with their own ideas that fit with a specific faculty member's research interests.

Some recent undergraduate research projects include:

- "Geospatial Energy and Life Cycle Assessment of Oscillating Water Column Systems in the Northeast"
- "Exploring Bird Evolution: An Ornithology Lesson for Middle and High School Students"
- "The impact of ENSO and AMO on selected glaciers in the Andes of South America"

https://commons.wikimedia.org/wiki/File:Adirond ack_Park_map_with_Blue_Line.svg

Hand-on education: simulating atmospheric and oceanic flows in a rotating tank, drying soil samples, launching a weather balloon.

Honors Program:

Students with a cumulative GPA of at least 3.25, and 3.5 in the major, are eligible to apply for a B.S. with honors in environmental science. Students must complete 83-84 credits including two semesters of Undergraduate Research (ENV 498) leading to an undergraduate thesis and oral presentation.

Extra-curricular activities:

There are hundreds of campus groups where you can meet up with others that share your interests, including a number of sustainability and environmental campus groups:

- The UAlbany Outdoors Club
- UAlbany Students for Sustainability
- UAlbany Grow Green

Many of our students also volunteer at the annual DAES Family Earth Day event.

Minors:

While adding a minor isn't required for ENV majors, it is a great way to diversify your education and learn extra skills that make you more attractive to future employers. Some common minors among environmental science majors include:

• Sustainability

• Atmospheric Science

Informatics

- Coographic Information System
- Geographic Information Systems (Certificate)
- ... although dozens of other possibilities exist as well.

Careers:

Many of our undergraduate degree recipients continue their education in graduate school in areas such as environmental engineering, law, teaching, geography/GIS, climate science, or ecology. There are also a significant number of jobs available to students with Bachelor's degrees. Some of the more common jobs are in:

- Environmental monitoring (air & water quality)
- Environmental consulting
- Renewable energy

- Environmental instrumentation
- Environmental policy
- Environmental education

Volunteers at our annual "Family Earth Day" event
