

## **PASSWORDLESS LOGON TO headnode (or any other machine)**

### For Mac or Linux computers

```
$ cd [go to your home directory]  
$ mkdir -p .ssh [makes a new hidden directory if not present]  
$ cd .ssh [moves into hidden directory]
```

- *only if you have never done this before:*

```
$ ssh-keygen [just keep hitting return key when prompted]
```

- *for headnode (or any other machine you want passwordless access to):*

```
$ ssh-copy-id [yournetid]@headnode7.rit.albany.edu  
$ ssh-copy-id [yournetid]@head.arcc.albany.edu
```
