

Paul Mann's slides

Jamaica and the Caribbean
and some others

11/28/77

Dear Paul,

Thanks for your letter. We encourage prospective students to visit whenever possible and are glad that you're considering a visit. The spring semester begins January 23, and any date after that should find virtually all of us (faculty and students) present. Several of us will have been at a conference in London the preceding week (and I will have been in Turkey the week before that), so I recommend you come no earlier than the 23rd. Any time after then, up to and including your Feb. 3 limit, would be excellent.

Sincerely,
Steve DeLong

6th Dec. 1977

Dear Mr. Mann, I am writing in response to your letter requesting information about tectonic research going on and planned in Albany. A summary :-

Kevin Burke: Tectonic history of the basin with field studies particularly in Jamaica

Bill Kidd: Studies of ophiolites, arcs and arc-trench gaps of Ordovician age in Newfoundland

John Dewey: Newfoundland ophiolite - structural tectonic work in the Swiss/Austria and Italian Alps

Steve DeLong / Jeff Fox / John Dewey: Tectonic and structural studies of oceanic and continental transform and shear zones

Burke / Kidd / Dewey: Tectonic evolution of

Ticket (mainly from LANDSAT images).
If you want more detailed information you can call me collect at (518) 457-7319

Sincerely
John Dewey
