

# ATM 200 “Geologic Timeline Mitigation”

You should first print out the “*Geologic Timeline*” that is available on the class web page. Then, you are to write in the major points in Earth history, as designated by the ► symbol in the notes from the three lectures on Monday (11/9), Wednesday (11/11) and Friday (11/13), directly on the “Geologic Timeline”.

**In order for the “*Geologic Timeline*” to be valid, it must have your name on it. Copies are not acceptable. It must be an original work. *Recommendation:* use different colors, especially to highlight the “Big 5” mass extinctions.**

As before, **carry this mitigation with you** to class beginning on **Monday, November 30th**, the first lecture of Part 4. When a “*disaster*” occurs in lecture, you will hand in this “*Geologic Timeline*” to mitigate the “*disaster*” and **earn one (1) final grade bonus point!**
