

Directions:

While face down, fold corners to middle

5. While face down, fold the corners to the middle

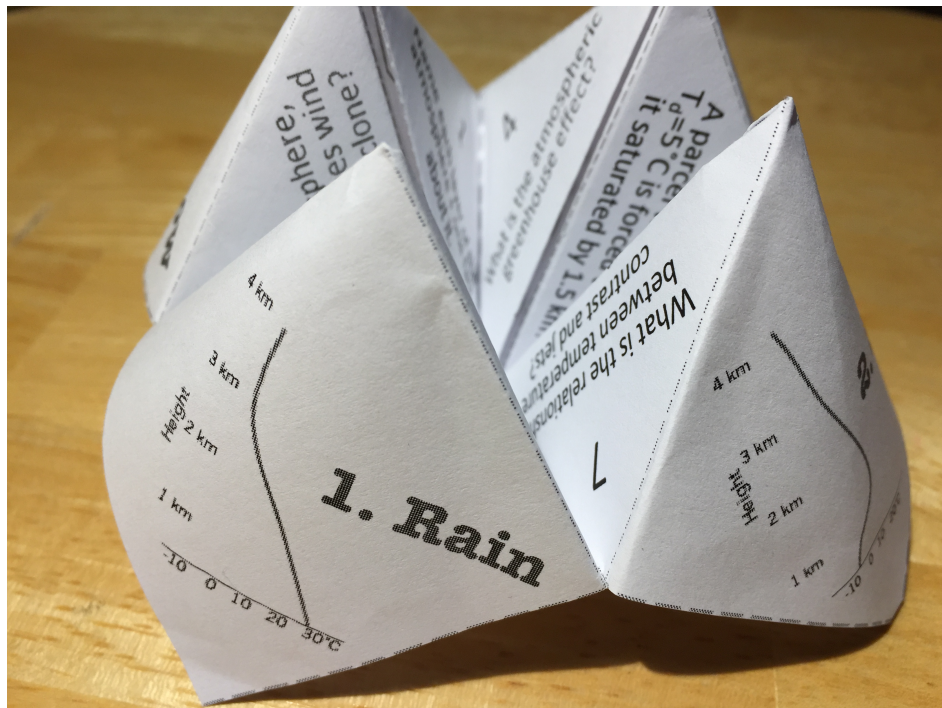

6. Fold along center lines into a square, then pop out each flap to create the pockets for your fingers

Make a super awesome study game!

Tips on using this template:

- The four outer boxes will be the outside face of your final product. Be sure to rotate your text/images so that the tops point to the middle of the template
- The small triangles with numbers will be the inside (see picture below), you can add questions here
- The large triangles in the middle will be what you lift the flap to see, this could be your answer or a hint for your answer.

Have fun!

I hope this is helpful! I'd love to see how you use it!
