

LEGEND

GABBROIC INTRUSION (geology after Hussey, 1961; 1962)

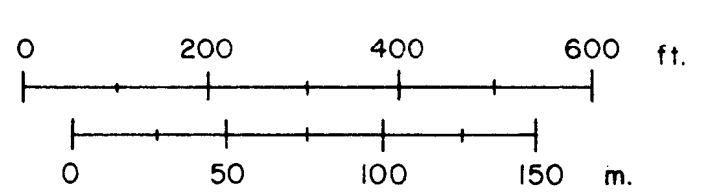

- Sk Silurian Kittery Formation
- g normal gabbro
- ag anorthositic gabbro
- cg cortlandtitic gabbro
- pg pegmatitic gabbro
- bx "agglomeratic" breccia

HOST ROCK EXPOSURES

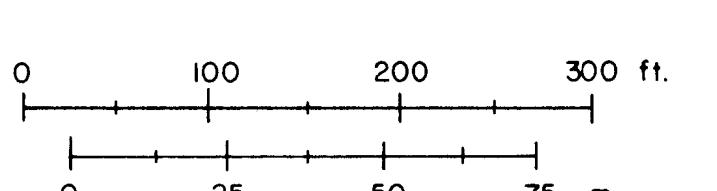

- Dikes (in 1:2400 map)
- mafic dikes (in 1:1200 map)
- felsic dikes (in 1:1200 map)
- intrusive gabbro contact
- ring fracture fabric (adjacent to coastal sections where developed)
- late brittle fractures

SCALES

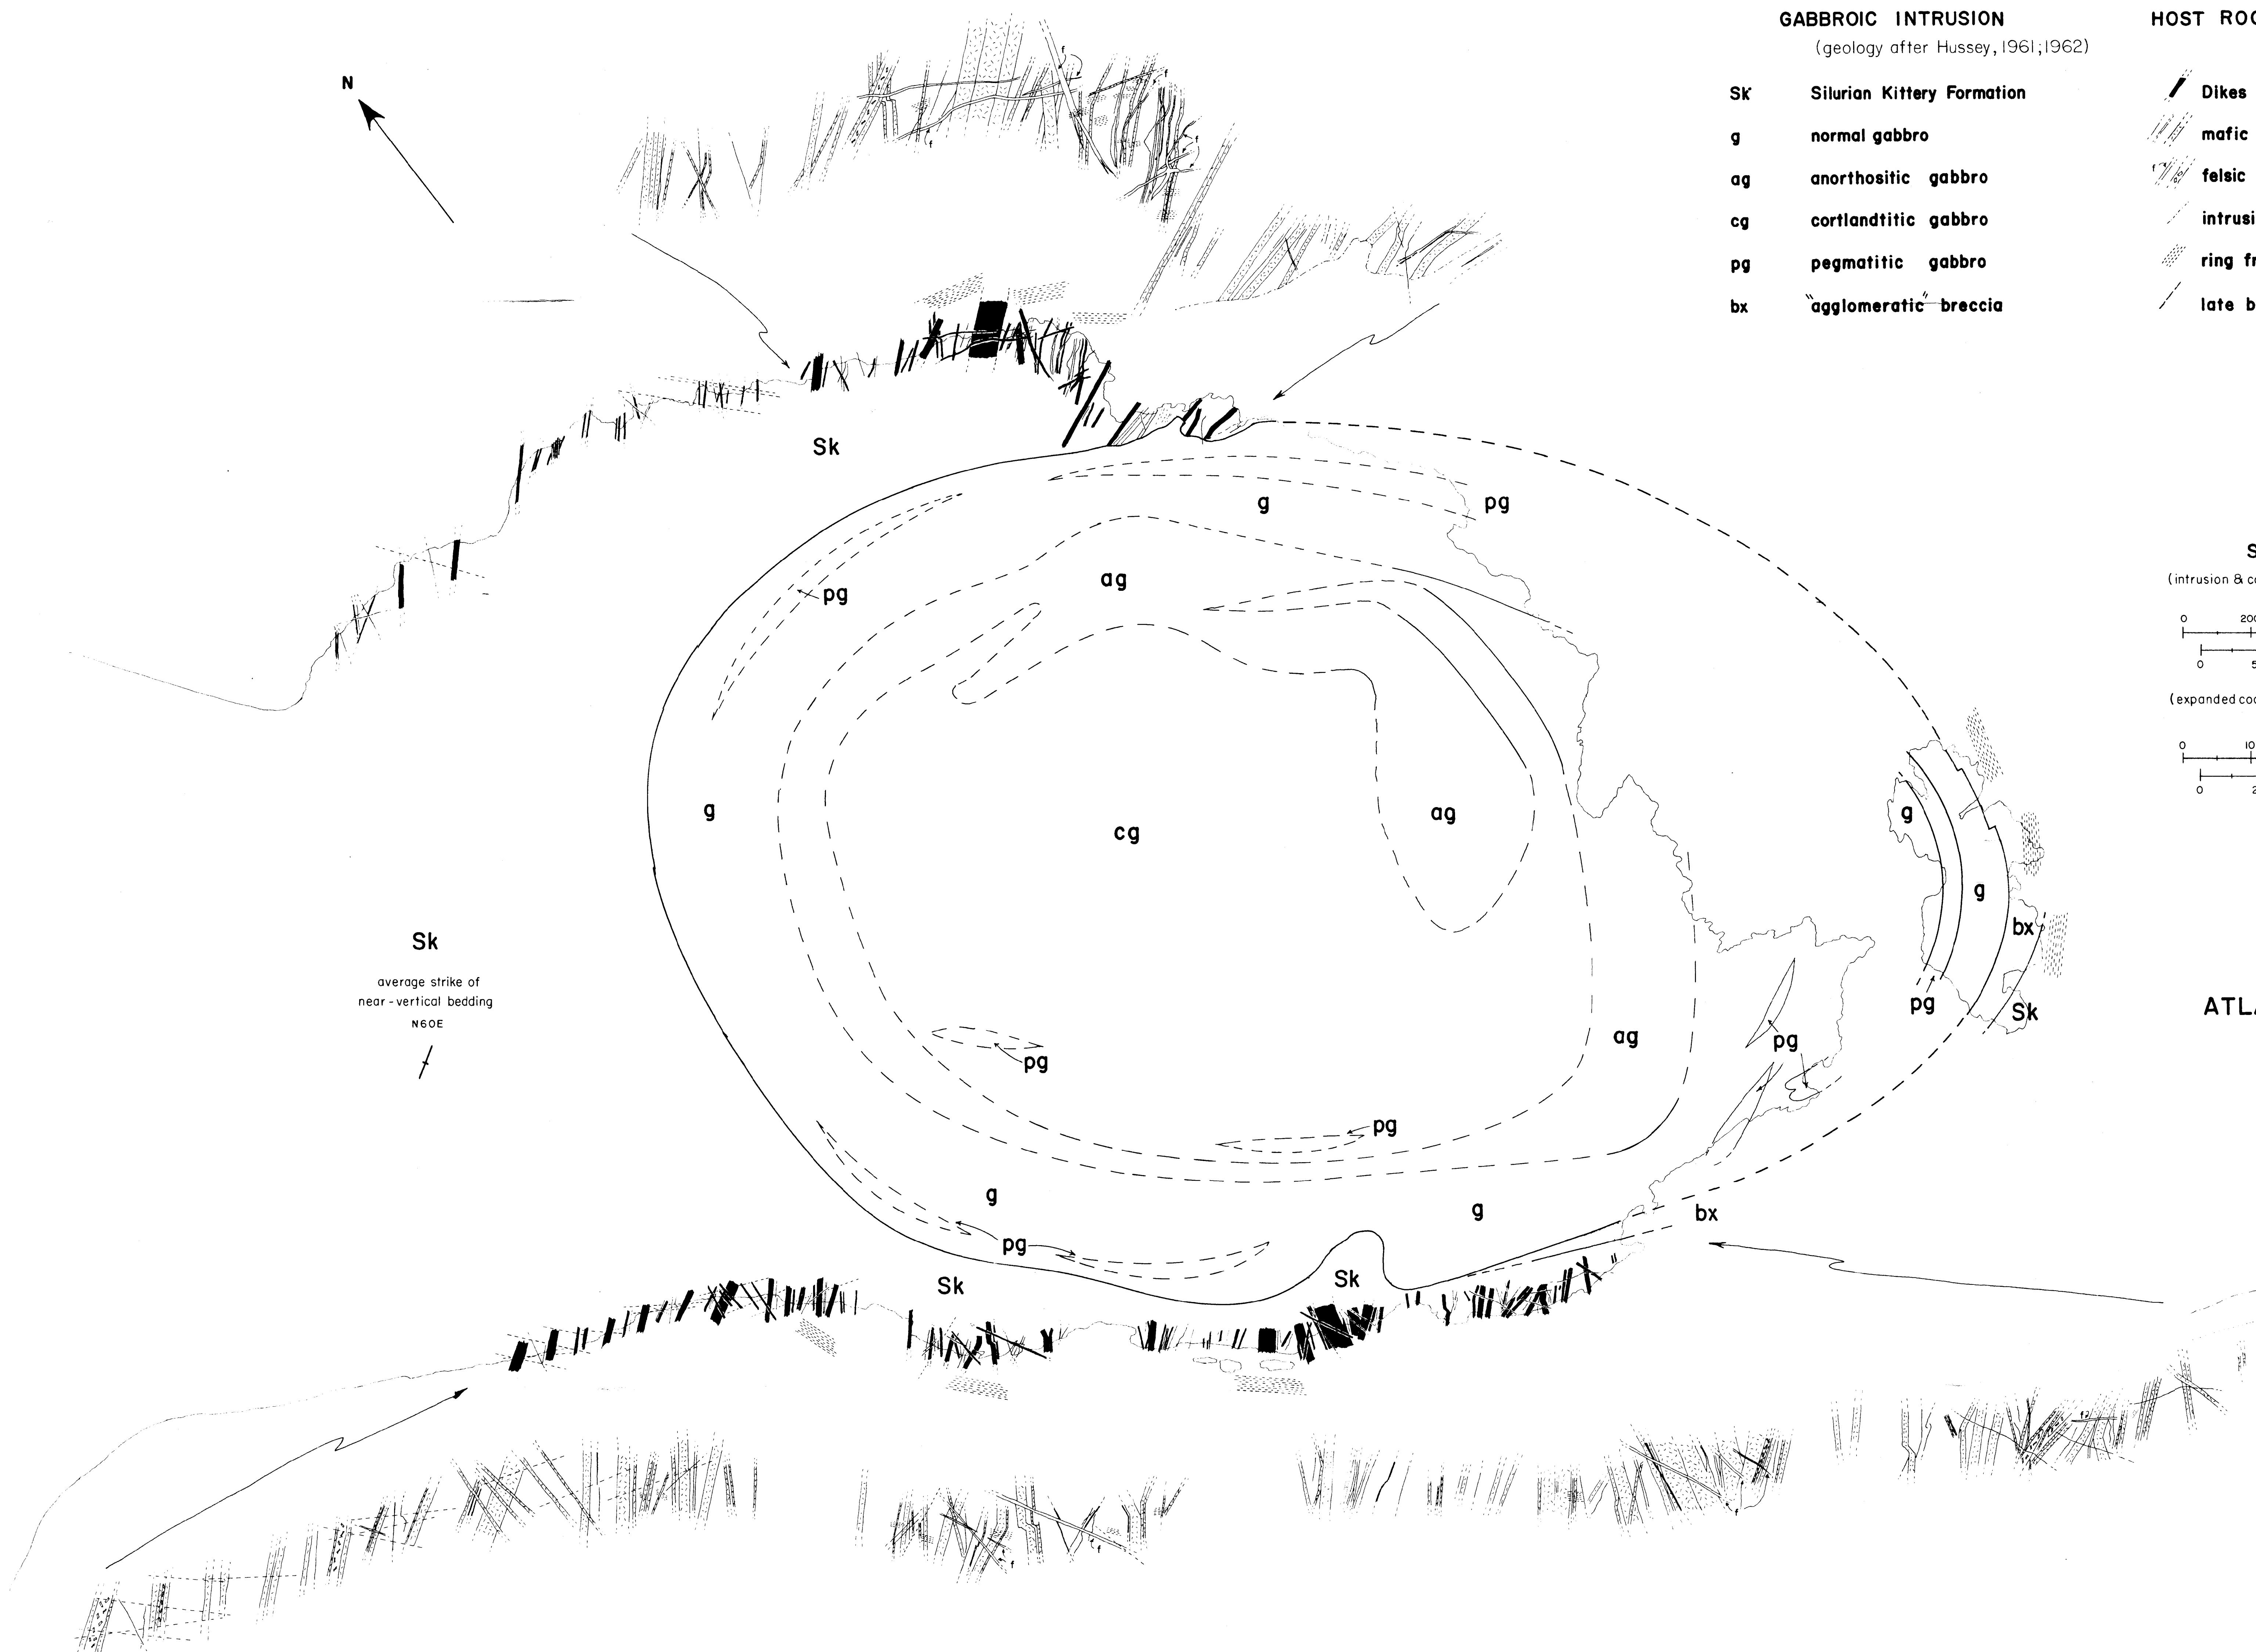

(intrusion & coastal exposures 1:2400)

(expanded coastal exposures 1:1200)
